

CONTENTS

Preface	iii
---------------	-----

WATER CHEMISTRY AND POLLUTION

Dissolved oxygen in Lake Erie, past and present. <i>John F. Carr</i>	1
A pollution study of western Lake Ontario. <i>D. H. Matheson</i>	15
Chemistry of western Lake Ontario. <i>J. R. Kramer</i>	21
Water pollution and the ecology of some aquatic invertebrates in the lower Detroit River. <i>George S. Hunt</i>	29
Studies of eutrophication processes in the Great Lakes. <i>Charles F. Powers</i> . (Abs.)	50

PHYSICAL LIMNOLOGY AND METEOROLOGY

The feasibility of a dynamic model of Lake Michigan. <i>D. R. F. Harleman, E. R. Holley, Jr., J. A. Hoopes, and R. R. Rumer, Jr.</i>	51
Light penetration in the Great Lakes. <i>Alfred M. Beeton</i>	68
Tracking water movements with drogues positioned by radio direction finding. <i>D. V. Anderson, D. H. Matheson, and D. A. Whiteman</i>	77
On classification of rivers in the Great Lakes—St. Lawrence Basin. <i>Boris S. Browzin</i>	86
A numerical procedure for computing wind-driven currents on the Great Lakes. <i>David L. Jones and Frank R. Bellaire</i>	93
An evaluation of the land-lake vapor pressure relationship for the Great Lakes. <i>T. L. Richards and J. P. Fortin</i>	103
Influence of Lake Michigan on squall line rainfall. <i>G. E. Stout and K. E. Wilk</i>	111
Correlation of waves and shore winds, Lake Ontario. <i>Arthur Brebner and R. J. Kennedy</i>	116
A regression model for the prediction of storm surges on Lake Erie. <i>D. Lee Harris and Aldo Angelo</i> . (Abs.)	123
An instance of upwelling along the east shore of Lake Michigan, 1955. <i>James W. Moffett</i> . (Abs.)	126
The micrometeorology of Douglas Point, Ontario. <i>R. E. Munn</i> . (Abs.) ..	127
Studies of currents in Lake Michigan and related activities. <i>H. W. Poston and J. L. Verber</i> . (Abs.)	127

GEOLOGY

- Delta structures in the New York Finger Lakes and their relation to the effects of currents on sediment distribution and aquatic organisms. *John F. Storr* 129
- Problems on the origin of Lake Superior. *James H. Zumberge*. (Abs.) . . 139

BIOLOGY

- Preliminary report on ostracodes from Lake Erie and their stratigraphic implications. *Richard H. Benson and Harold C. MacDonald* 140
- Factors affecting winter quality of lake water. *Russell L. Johnson* 150
- Survival of *Salmonella*, *Shigella* and *Coliforms* in Lake Michigan water. *L. R. Hedrick, Rosemarie Meyer, and M. Kossoy* 159
- A shipboard method for estimating photosynthesis in the Great Lakes. *G. W. Saunders, F. B. Trama, and R. W. Bachman*. (Abs.) 172
- Microorganic constituents of water of the Great Lakes. *L. L. Kempe, Stacy Daniels, and Alfred M. Beeton*. (Abs.) 172
- Seasonal changes with depth in population of *Pontoporeia affinis* (Amphipoda) in South Bay, Lake Huron. *John E. Cooper*. (Abs.) 173
- Role of cladocera in the freshwater strontium cycle and influence of dissolved salts. *J. S. Marshall and P. A. Nessel*. (Abs.) 174
- Notes on the distribution of benthos in the Straits of Mackinac region. *E. B. Henson*. (Abs.) 174

INSTRUMENTATION

- Equipment for the Douglas Point observation towers and foreseeable developments. *J. H. S. Bradley* 176
- Kaho—Exploratory fishing and gear research vessel for the Great Lakes. *M. R. Greenwood*. (Abs.) 184
- Limnological and meteorological observation towers in the Great Lakes. *R. E. Deane*. (Abs.) 184

POLICY AND COORDINATION

- Pollution control in the Great Lakes. *A. E. Berry* 186
- Activities of the Co-ordinating Committee on Great Lakes Basic Hydrologic Data. *H. B. Rosenberg* 192
- Some thoughts on Great Lakes public policy. *Marvin Fast* 195
